Organic Vanilla

Vanilla is a spice with a long historical record, so this plant has become one of the most promising plants in Indonesia. This plant is widely cultivated in Indonesia and is focused as one of the export crops.

In Indonesia, to be precise in the Tombatu area, Minahasa, which is one of the locations for the growing area of vanilla plants. One of them is the garden that is owned by Mr. Amelius. He is a Vanilla expert in Southeast Minahasa, Manager of Organic Vanilla Village, as well as being the chairman of the Organic Vanilla Producers Association. Where he is also on a mission to promote high quality vanilla products (Gourmet)

The area of the vanilla plant that he cultivates is approximately 10 hectares and manages more than 50 hectares of Organic Vanilla Village in Minahasa, which each year has an increasing production value.

In this sub-district, there are dozens of families who cultivate vanilla plants with a land area of 50 ha consisting of 30 ha immature plants, 25 mature plants. The productivity level of the vanilla plant in Tombatu is around 177.42 kg / ha. Almost all of the vanilla crop commodities traded at the farm level are fresh vanilla fruit that has just been picked from the tree.
